```
PS C:\Users\Mahati\Desktop\My Programs> cd "c:\Users\Mahati\Desktop\My Programs\" ; if ($?) { g++ tempCodeRunnerFile.cpp -o tempCodeRunnerFile } ; if ($?)
{ .\tempCodeRunnerFile }

Enter the array:
Enter element no. 1: 85

Enter element no. 2: 97

Enter element no. 3: 30

Enter element no. 4: 39

Enter element no. 5: 24

Enter element no. 6: 97

Enter element no. 7: 08

Enter element no. 8: 15

Enter element no. 9: 83

Enter element no. 10: 70

Enter the element to be searched: 56

Enter the searching method you want:
1. Binary search
2. Sequential search
2

Array is: 85 97 30 39 24 97 8 15 83 70
Element has not been found in the array
